

QE4 Angle

The QE4A Series of angle wrenches when teamed with the IC Series Controllers provide superior accuracy and durability to meet your fastening requirements. The QE4A offer a torque range from 2.5 Nm to 34 Nm with speeds up to 1200 RPM. Bright LEDs and TactAlert provide positive feed back to the operators without distracting them from their task. The non-contacting switches, heavy duty gear train and DC brushless motor create a durable package that will keep your maintenance cost down. The small size, high speed, ergonomic grip and easy accessible controls will help keep your production line running smoothly.

Tool

- High free speed
- Compact lightweight design
- High duty cycle
- Status lights
- Non-contacting switches
- Trigger or lever start
- Rotary reverse switch

Cables

- Durable flexible cables
- 3, 6, and 10 meter tool cable lengths Straight or 90 degree versions
